DETAILED ACTION

1. Applicant is advised that the Notice of Allowance dated is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a Deposit Account.

2. Prosecution on the merits of this application is reopened on claims 1-2, 10-18, and 21-26 are considered unpatentable for the reasons indicated below:

Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2, 21-22, and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atemboski (prior art of record) in view of Sinsley '725 (prior art of record).

Art Unit: 3743

Atemboski discloses the invention substantially as claimed. In particular, Atemboski shows in Figs. 3-10 a gas burner for a gas fireplace, comprising:

a burner panel (20) defining a top surface and a bottom surface;

a bottom burner member (26) coupled to the burner panel (20);

wherein the burner panel (20) defines at least one aperture (48) to provided gas/air mixture to the top surface of the burner panel (20); and

wherein the burner panel (20) comprises a molded ceramic-fiber material (note col. 5, lines 35-45).

However, Atemboski does not disclose the use of a compression molding method to make the burner panel.

Sinsley '725 teaches the use of compression injection method for ceramic-fiber artificial fire logs or panels used in gas fireplaces (note col. 1, lines 55-62).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use this known compression molding method such as taught by Sinsley '725 to make the artificial burner panel of Atemboski, since one would merely be using a known method for making such structure.

5. Claims 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimek '237 (prior art of record) in view of Sinsley '725 (prior art of record).

Art Unit: 3743

Shimek '237 discloses the invention substantially as claimed. In particular, Shimek '237 shows in Figs. 15-18 a gas burner for a gas fireplace, comprising:

a burner panel (14) defining a top surface and a bottom surface;

a bottom burner member (17) coupled to the burner panel (14);

wherein the burner panel (14) defines at least one aperture (20,48,63) to provided gas/air mixture to the top surface of the burner panel (20);

wherein the burner panel (14) comprises a molded material (note col. 2, lines 11-19); and

wherein the burner panel (14) comprises a bottom panel of a combustion chamber enclosure (note Figure 12)..

However, Shimek '237 does not disclose the use of a compression molding method to make the burner panel.

Sinsley '725 teaches the use of compression injection method for ceramic-fiber artificial fire logs or panels used in gas fireplaces (note col. 1, lines 55-62).

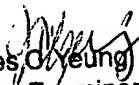

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use this known compression molding method such as taught by Sinsley '725 to make the artificial burner panel of Shimek '237, since one would merely be using a known method for making such structure.

6. Claims 23-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
